### Help make your school a place where a child FEELS and IS safe!

- Does your school have even one bully?
- Are there kids who are unkind to others?
- Do you have a problem with students NOT reporting information about something that is unsafe, illegal, or wrong?
- Would you like to reduce the incidence of violence or other undesirable behaviors?

If you answer YES to any of these, we recommend you review our [S.T.A.R. program](#).

### Help your students FEEL and BE safe when they are away from the school!

- Should your students know how to respond to a lure?
- Should your students know how to discern who is "safe" and who is not?
- Should your students know proper home alone skills?
- Should your students know how to deal with pressures and dares?
- Should your students know how to deal effectively and non-violently with conflict?

If you answer YES to any of these, we recommend you review our [Be a Safety Kid curriculum](#).

**Children need to be properly instructed about essential safety skills.** Schools, parents, and law enforcement all need to be "on the same page" about the best and most effective concepts and skills for children.

**Eliminate the use of the word "stranger". Replace it with the [Check First concept](#)!**

**Let us help you with that goal.**
